

Crystal Blue is engaged on a wide range of projects that require the application of many specialist skills, e.g. corporate finance, financial planning, workforce planning, resource allocation, operational reviews, statistical analysis. To provide a tailored service to our clients we call upon our network of associates that spans academic institutions, professional bodies, and specialist consultants. Operating in this manner avoids the need to fund large overheads and allows Crystal Blue to offer its services at competitive rates.

As well as leading projects, we are often engaged to provide technical and research capacity to universities departments and other bodies.

We offer high quality economic and financial consultancy to both the public and private sectors. Examples of the services we offer are listed to the right. (See also our [projects page](#) ).
